OBJECTIVE

I am a fresher looking for a role as a React or Frontend developer in an organization where I can showcase my talent, upscale my skillset, and benefit both the company and myself. I do have hands-on practice with React.js, JavaScript, and its related libraries.

SKILLS

- React
- Javascript
- Redux
- HTML
- CSS
- Git and Github
- Bootstrap
- Tailwind css
- Material Ui
- React Router
- Styled components
- Norigin Media Spatial Navigation
- React Query
- Ms Office

LANGUAGE

- ✓ English
- ✓ Tamil

EXPERIENCE

📍 **GKB Hi Tech Lenses Pvt. Ltd., Coimbatore** 2022 - 2024

Customer Care Executive

- Provided exceptional customer service and support to clients through various channels including phone, email, and live chat, ensuring prompt resolution of inquiries and issues.
- Utilized CRM software to manage customer interactions, document inquiries, and track resolution progress, ensuring accurate and timely follow-up on all customer requests.

📍 **Industrial Technoblitz, Chennai** 2017 - 2021

Service Technician

- Executed installation, maintenance, and repair tasks for a range of technical equipment, including adhering to manufacturer guidelines and safety protocols to ensure optimal functionality and client satisfaction.
- Conducted thorough diagnostics and troubleshooting to identify equipment malfunctions and performance issues, utilizing technical expertise and problem-solving skills to implement timely and effective solutions.

EDUCATION

📍 **St. Joseph's College of Engineering, Chennai** 2012 - 2016

B.E - Mechanical Engineering
6.5 CGPA

📍 **Kanchi Sri Sankara Matric. Hr. Sec. School, Tiruchendur** 2012

Higher Secondary Certificate
80%

📍 **Kanchi Sri Sankara Matric. Hr. Sec. School, Tiruchendur** 2010

SSLC
88.4%

PROJECTS

📍 **Netflix Clone**

- I have used Styled Components to build User Interactive design and also to utilize component styling flexibility using props

- **I have used TMDB API** to mock Netflix data where I fetch movie and TV show data, employing **asynchronous functions and axios** for seamless data retrieval

- Implemented **Norigin Media Spatial Navigation** for intuitive TV remote navigation.

👉 Jobster

- I have used Material UI components to craft a visually appealing and intuitive user interface, adhering to modern design principles and best practices
- Used Redux to handle applications global state management
- Used **Restful API integration** techniques to seamlessly retrieve job data, ensuring efficient data communication between the frontend and backend system
- Leveraged React Query to optimize data fetching and management, enhancing the performance by employing its inbuilt cache mechanism .

👉 eCommerce Project

- I have used Tailwind CSS to style and design the product interface, leveraging its utility-first approach to create responsive and visually appealing layouts.
- Used Redux to handle applications global state management
- Leveraged **React Query** to optimize data fetching and management, enhancing the performance and responsiveness of the job search interface.
- Successfully **integrated third-party libraries** to enhance the functionality of the product catalog, enabling features such as image carousels, interactive product filters, or advanced search capabilities.

👉 Match Makers Clone

- **Bootstrap** to style and design the product interface, leveraging its utility-first approach to create responsive and visually appealing layouts.
- Utilized **Redux** for efficient state management , ensuring a centralized and predictable way to manage application state across various components and features.
- Implemented GraphQL resolvers to resolve queries and mutations.
